

MINAMATA PROMISE TO THE UNBORN

**Recommendation by Kamito Keiko,
President of Japan Rachel Carson Society**

Rachel Carson, the author of *Silent Spring*, said that we are under the spell of chemical substances from the moment that we are conceived in the mother's womb.

It is congenital Minamata disease that is the result of that spell.

This book is a documentary of the acts of a female physician, who has kept watching

the children who could not be born,

the mothers who carry the sorrow and chagrin of loss of their children and

the patients with Minamata disease who live with the sufferings from so many disabilities.

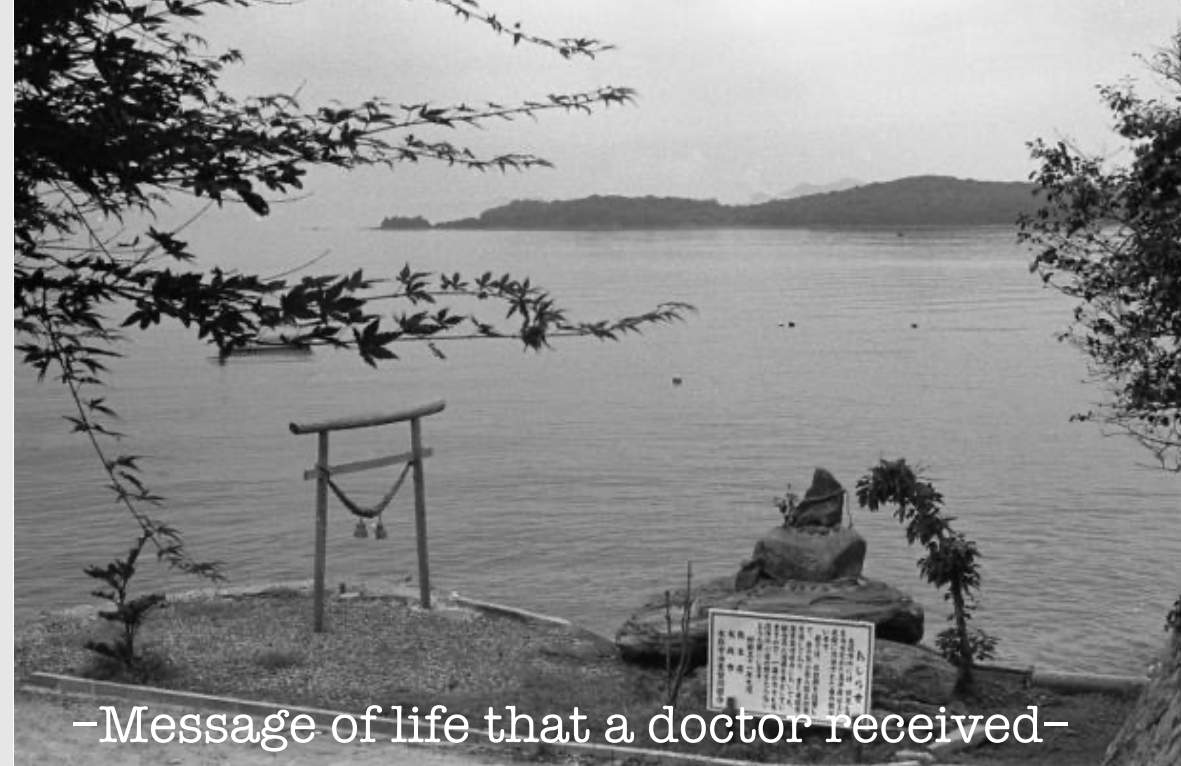

We must receive the message of life from these lives.
